A small endless race game with several different level types for a price that is more than fair. The graphics are really enjoyable and smooth. The races are fun yet very challenging, and since there is more than just one map it's quite varied and doesn't get boring. Just turn on some smooth synthwave, lay back with your controller and play.. The game is excellent. Fans of strategies are required to pass. The sound is excellent. the gameplay is quite simple but interesting. Even if i am a die hard witcher fan, this game is a bit deficient for me, it is a transition stage to witcher 3. I expected a greater and perfectly finished storyline like the first game. Overall, this is must-play witcher game as well as witcher 1. do not play witcher 3 first, go on by the order, that will satisfy you even more when you will finish witcher 3.. if you drink vodka for breakfast

this game is just for you. Better than magic the gathering.. A must have if you got the Portsmouth direct line

Fantastic! love it!. Won't install new "module" based tests, so that's cool.. I liked it, great music and visuals. Good job, team!. Can not even come close to recommending this game as it stands. In the half an hour I played it I have already beaten it and collected almost all of the trophies. Basically this game is the most dumbed down "stealth" game you can imagine just running around avoiding aliens while you plant bombs on their nests. You go through about 5-6 night cycles doing this while the game gets progressively harder every night adding more and new enemies to the field each night. The enemies are boring and predictable with silly footstep sounds reminiscent of minecraft and have a set patrol pattern making them honestly laughable in their pathetic attempts of fighting you despite their pretty awesome and creepy look to them. With some serious elbow grease and ALOT more content I could see this being worth 5\$ but as it stands with literally half an hour worth of actual gameplay I would honestly say this is worth like 50 cents.. I love it.

But, the low amount of players makes it hard to find a good session.

. This game with my Vive when I bought it, and it's okay for an introduction to a wave shooter. The cartoony graphics are fine for what they are, but the repetitive nature wasn't enough to keep me coming back, and definitely not for the amount of time it would take to unlock the cool guns I actually wanted to use. There is a mode where you can shoot them in the dark, and your guns are flashlights which is pretty neat, but overall it doesn't have much to offer other than being a simple shooter. I don't think I would have paid for it if it had not been bundled with my Vive.. If you're planning on buying Aurum, buy these packs first. You get more for your money. Also, don't buy the cache keys... trade the Aurum for MoF and use that to buy the stuff from the chest in the AH. I made the mistake of buying cache keys and lost a lot of profit.. great unique puzzle game

deeper than it appears. I got this game for my 2 year old son. Though he can't use a mouse properly, he loves the colors and the animations when completeing a picture. I actually found myself playing it for a bit after he went off to do something else. If you have kids, this is a great game and at \$2 it's actually cheaper than a coloring book. You also unlock more pictures as you play, though I'm not sure how many there are total, but I'm expecting to get a lot of time out of this.. Played previous edition while I was 8 or 9... That edition was awesome, good old days.

Well, this edition doesn't work on Windows 10 1703. Nothing more to say.
